SUMMARY

Aspiring Data Analyst with an MBA in Business Analytics & HR and 3+ years of overall professional experience. Skilled in SQL, Excel, Power BI, and Python, with hands-on experience in data cleaning, analysis, ETL, KPI reporting, and dashboard development. Passionate about transforming data into actionable business insights and seeking opportunities to transition into Data Analytics roles.

Skills

- **Power BI:** Power Query, Data Modeling, DAX, Visualizations, Dashboards, KPI.
- **SQL (MySQL):** SQL Joins, Subqueries, Window Functions, Aggregations, SQL Query Optimization.
- **Microsoft Excel:** Pivot Tables, Dashboards, Advanced Excel, Formulas, Data Cleaning and Reporting.
- **Data Analysis Skills:** Data Cleaning, Transformation, KPI Tracking, Trend Analysis, Business Insights, Data Storytelling, Data Warehousing, Fundamentals of Data Engineering.
- **Python:** Pandas, NumPy, Matplotlib; Data Visualization.
- **Statistical Analysis:** EDA, Hypothesis Testing, Linear & Logistic Regression, Statistical Analysis.
- **Soft Skills:** Business Insights, Stakeholder Management, Communication, Documentation, Decision-Making.

Education

- **University of Hyderabad** — MBA in Human Resources Management and Business Analytics. - CGPA: 8.27/10 (Gold Medalist) August 2023 – June 2025
- **Anurag Group of Institutions (JNTUH)** — B.Tech in Electronics and Communication Engineering - CGPA: 8.76/10 August 2015 – June 2019

Internship

Data Analytics Intern, Ovkay Logistic Services — Hyderabad January 2025 – March 2025
Tools & Skills Used: Excel, Power BI, Power Query, Data Cleaning, Data Modeling, Dashboard Development, KPI Reporting. [View Project](#)

- Performed extensive data transformation integrated and cleaned multiple Excel datasets, using Power Query, including null handling, trimming, and creating custom conditional columns.
- Designed a star-schema data model using fact and dimension tables for efficient data analysis.
- Developed interactive dashboards with KPIs, charts, and tables to monitor logistics performance metrics.
- Created calculated columns and DAX measures to derive key business metrics, enabling dynamic analysis and accurate KPI reporting.
- Contributed to nearly 60% operational efficiency improvement through analytical insights and reporting automation.

Experience

- **Management Trainee – Human Resources (HRBP), Cyient** — Hyderabad August 2025 – Present
- Developed an Excel-based attrition prediction model using logistic regression to identify early warning signs and assess attrition risk for 200 employees as a pilot initiative.
- Interpreted HR policies and business processes to generate actionable insights and support the Connectivity Business Unit as a BUHR, with a head count of nearly 1900+ employees.
- Analyzed ASIP reports for two major business units and tested nearly 30 HR query scenarios in the CY People Connect AI Bot integrated with Copilot to improve HR insights and query resolution.
- Conducted 50+ resignation discussions, regular HR floor connects, and engagement activities; managed 10+ pool actions and maintained 3+ monthly HR reports, attrition analyses, and dashboards.

- Analyzed 1,200+ deployment and change request records to identify trends and bottlenecks.
- Built Excel-based reports to track KPIs, reducing process errors by 95% and improving reporting accuracy.
- Automated tracking workflows, improving data quality and achieving 90% on-time releases.
- Collaborated with cross-functional stakeholders to communicate release schedules, risks, and status updates, strengthening stakeholder management and business communication.
- Delivered actionable insights to leadership and technical teams, improving release planning, execution efficiency, and process governance.
- Raised and managed ServiceNow change requests for deployments, coordinating with stakeholders to secure approvals and ensure timely release execution in compliance with change management processes.

Projects

1. Employee Attendance & Leave Patterns Dashboard

[View Project](#)

Tools: MS Excel, MySQL, Power BI, DAX, Data Cleaning, Data Visualization

- Developed an interactive HR attendance and leave patterns, dashboard by processing 1,000 + employee attendance records.
- Implemented advanced DAX calculations to derive Presence%, WFH%, and SL%, by day of the week and by using the month filters.
- Automated data preparation in Power BI using Power Query by consolidating, transforming, and standardizing multi-source datasets for HR reporting and analytics.
- Analyzed attendance and leave patterns to generate workforce insights and support data-driven HR decision-making.

2.TGSRTC Hyderabad City Routes and Trips & Operation Analytics Dashboard

[View Project](#)

Tools:MySQL, Excel, Power BI, Power Query, DAX, Data Transformation, Dashboard.

- Processed and analyzed 978K+ public transit records across routes, trips, stops, schedules, and depot operations using MySQL and Power BI.
- Developed interactive Power BI dashboards tracking 38K+ trips, 983 routes, and 5K+ stops with dynamic filtering and KPI monitoring.
- Built DAX measures to identify peak operating hours, busiest routes, depot-wise trip distribution, and service utilization patterns. Also, developed the KPI measures such as Route hour analysis, route utilization rate etc.
- Identified 25–30% underutilized routes, helping optimize schedules and resource allocation.
- Performed the data cleaning, data transformation, leveraging Sql joins and aggregations to transform 1 million transit schedule records to evaluate the operational efficiency.

3.Credit Card Analysis and Customer Transaction Report

[View Project](#)

Tools:MySQL, Excel, Power BI, Power Query, DAX, Data Transformation, Dashboard.

- Built Credit Card Customer and Transaction Analysis dashboards using Excel, SQL, Power BI, Power Query, and DAX..
- Developed KPI dashboards to track key metrics such as Revenue (55.3M), Interest Earned (8M), Customer Satisfaction Score (3.19/5), and Transactions, using DAX, and made interactive with filters, slicers etc.
- Created DAX measures and calculated columns for Age Groups, Income Groups, Revenue calculations, Week Numbers, and Week-over-Week Revenue analysis.
- Imported and transformed customer and transaction data from MySQL into Power BI using Power Query for reporting and analysis.

Certifications

- **SQL for Data Science** — Hands-on experience with SQL joins, aggregations, and relational querying.
- **Data Analysis and Visualization using Power BI** — Data modeling, DAX, dashboards, AI visuals.
